

Capability Statement

Connecting shippers to domestic and international destinations — on time, every time.

Company Overview

Hanz Logistics is an air freight forwarder coordinating mission-critical cargo with documented planning, active milestone oversight, and accountable delivery records. Every shipment is handled to one operational standard: **certainty through every handoff.**

Core Logistics Capabilities

Expedited Air Freight

Next-flight-out and time-definite routing for cargo that must keep moving, with priority uplift evaluation and active milestone monitoring through final delivery.

Air Charter Solutions

Dedicated aircraft matched to payload, airport access, handling requirements, and destination timing when commercial schedules cannot meet the mission.

On-Board Courier / Hand-Carry

A dedicated courier personally accompanies critical cargo from collection through final handoff, maintaining direct chain of custody throughout the journey.

Specialized Handling

Purpose-built handling plans for temperature-sensitive cargo, dangerous-goods support, oversized equipment, and high-value freight.

Air Freight Coordination

End-to-end forwarding from pickup through carrier booking, export/import documentation, customs handoffs, and door-to-door delivery oversight.

Door-to-Door Oversight

Pickup, airport transfer, flight uplift, customs coordination, and final-mile delivery managed as one continuous movement.

PLAN • TRACK • CLOSE OUT

Documented planning. Active oversight. Verified delivery records.

Industries Served

Specialized logistics for high-stakes sectors, with handling plans built around cargo risk, urgency, and compliance needs.

Healthcare

Temperature-sensitive materials, critical devices, therapies, and cold-chain coordination.

Aerospace & Defense

Controlled components, AOG parts, and high-value equipment with secure routing.

Advanced Manufacturing

Line-down parts, specialized tooling, and plant-direct delivery to prevent downtime.

Business Technology

High-value servers, infrastructure, and secure data-center delivery.

Robotics & Energy

Prototype security, battery transport compliance, and field-critical shipment support.

Research

Unique specimens, sensitive scientific instruments, and timeline-critical project logistics.

The Hanz Operations Standard

1

PLAN

Urgency, dimensions, weight, handling needs, route, and contingencies are mapped before tender, with a documented plan for every handoff.

2

TRACK

Active milestones and human oversight keep the shipment visible in motion, with operators coordinating exceptions across carriers and partners.

3

CLOSE OUT

Delivery confirmation, proof of delivery, and chain of custody records consolidate the complete shipment file for review and compliance.

Operational Strengths

- Domestic and international reach with **24/7/365** operations dispatch.
- **Plan→Track→Close Out** ownership by a dedicated Hanz operator.
- Documented planning before tender, with proof-of-delivery closure on every job.
- TSA Indirect Air Carrier (IAC) compliant, with TWIC-cleared personnel.
- Customer-centric operations with clear communication and reliable handoffs.
- Initial flight options and handling plans typically within **15–30 minutes**.

What shippers can expect. One operator owns the movement from first call through verified delivery — documented plan, active oversight, and complete close-out. **Certainty through every handoff.**

How to Engage Operations

When freight cannot wait, contact Hanz dispatch with what is moving, the route, timing, and handling constraints. An operator evaluates uplift options, confirms the plan, and stays with the shipment through close-out. From healthcare and aerospace to manufacturing, technology, energy, and research, the same operating standard applies.

01 Call or email dispatch • **02** Confirm the handling plan • **03** Move with active oversight
