Company Overview

Hanz Logistics is an air freight forwarder coordinating mission-critical cargo with documented planning, active milestone oversight, and accountable delivery records. Shipments are handled to one operational standard: certainty through every handoff.

Core Logistics Capabilities

- Expedited air freight — next-flight-out and time-definite routing with active milestone monitoring.
- Air charter solutions — dedicated aircraft matched to payload, airport access, handling needs, and timing.
- On-board courier / hand-carry (OBC) — dedicated human custody from collection through final handoff.
- Specialized handling — cold-chain coordination, dangerous-goods support, oversized and high-value freight.
- Door-to-door coordination and documented chain-of-custody practices.

Shipment Visibility

Customers may track shipments using a Hanz reference number and, when linked, a carrier airway bill (AWB). Visibility combines operator oversight with carrier tracking data when an AWB is available. Tracking displays depend on received carrier data and may be incomplete until updates are available.

Industries Served

Hanz supports high-stakes sectors including Healthcare; Aerospace + Defense; Advanced Manufacturing; Business Technology; Robotics + Energy; and Research — with handling plans built around cargo risk, urgency, and compliance needs.

Operational Strengths

- Domestic and global operational reach.
- Plan !' Track !' Account process ownership by a Hanz operator.
- Documented movement planning before tender and proof-of-delivery closure.
- TSA Indirect Air Carrier (IAC) compliant; TWIC cleared.
