

Capability Statement

Connecting shippers to domestic and worldwide destinations — on time, every time.

Company Overview

Hanz Logistics is an air freight forwarder coordinating mission-critical cargo with documented planning, active milestone oversight, and accountable delivery records. Every shipment is handled to one operational standard: **certainty through every handoff**.

Core Logistics Capabilities

Expedited Air Freight

Next-flight-out and time-definite routing for cargo that must keep moving, with priority uplift evaluation and active milestone monitoring through final delivery.

Air Charter Solutions

Dedicated aircraft matched to payload, airport access, handling requirements, and destination timing when commercial schedules cannot meet the mission.

On-Board Courier / Hand-Carry

A dedicated courier personally accompanies critical cargo from collection through final handoff, maintaining direct chain-of-custody throughout the journey.

Specialized Handling

Purpose-built handling plans for temperature-sensitive cargo, dangerous-goods support, oversized equipment, and high-value freight.

Air Freight Coordination

End-to-end forwarding from pickup through carrier booking, export/import documentation, customs handoffs, and active milestone oversight through final delivery.

Door-to-Door Coordination

Comprehensive management across pickup, airport transfer, flight uplift, customs coordination, and final-mile delivery.

Visibility & Milestone Tracking

Shipments are tracked by Hanz reference number and, when linked, a carrier airway bill (AWB) — combining dedicated operator oversight with verified milestones at every handoff.

PLAN • TRACK • ACCOUNT

Documented planning. Active oversight. Accountable delivery records.

Industries Served

Specialized logistics solutions for high-stakes sectors, with handling plans built around cargo risk, urgency, and compliance needs.

Healthcare

Temperature-sensitive materials, critical devices, therapies, and cold-chain coordination.

Aerospace & Defense

Controlled components, AOG parts, and high-value equipment with secure routing.

Advanced Manufacturing

Line-down parts, specialized tooling, and plant-direct delivery to prevent downtime.

Business Technology

High-value servers, infrastructure, and secure data-center delivery.

Robotics & Energy

Prototype security, battery transport compliance, and field-critical shipment support.

Research

Unique specimens, sensitive scientific instruments, and timeline-critical project logistics.

The Hanz Operations Standard

PLAN

1 We map urgency, dimensions, weight, handling requirements, route, and contingencies before tender. A documented movement plan confirms responsibilities at every handoff.

TRACK

2 Active milestones and human oversight keep the shipment visible in motion. Operators proactively monitor exceptions and coordinate directly across carriers and ground partners.

ACCOUNT

3 Delivery confirmation, proof-of-delivery verification, and chain-of-custody documentation consolidate the complete shipment record for review and compliance.

Operational Strengths

- Domestic and global operational reach with 24/7/365 operations dispatch.
- **Plan**→**Track**→**Account** — end-to-end process ownership by a dedicated Hanz operator.
- Documented movement planning before tender, with proof-of-delivery closure on every job.
- TSA Indirect Air Carrier (IAC) compliant, with TWIC-cleared personnel.
