Company Overview

Hanz Logistics is an air freight forwarder coordinating mission-critical cargo with documented planning, active milestone oversight, and accountable delivery records. Shipments are handled to one operational standard: certainty through every handoff.

Core Logistics Capabilities

Expedited Air Freight

Next-flight-out and time-definite routing for cargo that must keep moving. Priority uplift evaluation and active milestone monitoring through final delivery.

Air Charter Solutions

Dedicated aircraft matched to payload, airport access, handling requirements, and destination timing when commercial schedules cannot meet the mission.

On-Board Courier / Hand-Carry (OBC)

Dedicated onboard courier personally accompanies critical cargo from collection through final handoff, maintaining direct chain-of-custody throughout the journey.

Specialized Handling

Purpose-built handling plans for temperature-sensitive cargo, dangerous-goods support, oversized equipment, and high-value freight.

Door-to-Door Coordination

Comprehensive management across pickup, airport transfer, flight uplift, customs coordination, and final-mile delivery.

Shipment Visibility & Milestone Tracking

Customers track shipments using a Hanz reference number and, when linked, a carrier airway bill (AWB). Visibility combines dedicated operator oversight with verified milestone updates across every handoff—providing reliable, human-verified status rather than an unattended tracking number.

The Hanz Operations Standard

1. Plan

We map urgency, dimensions, weight, handling requirements, route, and contingencies before tender. A documented movement plan confirms responsibilities at every handoff.

2. Track

Active milestones and human oversight keep the shipment visible in motion. Operators proactively monitor exceptions and coordinate directly across carriers and ground partners.

3. Account

Delivery confirmation, proof-of-delivery verification, and chain-of-custody documentation consolidate the complete shipment record for review and compliance.

Industries Served

Hanz provides specialized logistics solutions for high-stakes sectors with handling plans built around cargo risk, urgency, and compliance needs:

- **Healthcare** — Temperature-sensitive materials, critical devices, therapies, and cold-chain coordination.
- **Aerospace + Defense** — Controlled components, AOG parts, and high-value equipment with secure routing.
- **Advanced Manufacturing** — Line-down parts, specialized tooling, and plant-direct delivery to prevent downtime.
- **Business Technology** — High-value servers, infrastructure, and secure data-center delivery.
- **Robotics + Energy** — Prototype security, battery transport compliance, and field-critical shipment support.
- **Research** — Unique specimens, sensitive scientific instruments, and timeline-critical project logistics.

Operational Strengths

- Domestic and global operational reach with 24 / 7 / 365 operations dispatch.
- Plan → Track → Account end-to-end process ownership by a dedicated Hanz operator.
- Documented movement planning before tender and proof-of-delivery closure.
- TSA Indirect Air Carrier (IAC) compliant; TWIC cleared personnel.
